9:05am to 9:15am - Welcome and morning announcements and morning keynote Session introduction

Robert S. White, MD, FFAFP
NOHIMSS Chapter President /
Chief Medical Information Officer
Allegheny Health Network
Pittsburgh, PA

Robert White, MD is currently an Associate Chief Medical Information Officer at the Cleveland Clinic with responsibility for EHR integration, implementation, and optimization covering the clinic's main campus and numerous other regional hospitals and ambulatory facilities. As a physician subject matter expert, he engages in multiple system-wide initiatives to improve and expand the use of technology. He is the executive champion for the EHR Incentive Program and electronic clinical quality measure reporting efforts at Cleveland Clinic successfully attesting stage 1 and stage 2 for hundreds of providers and all system hospitals. Additional duties include all system-wide health information exchange efforts. He is board certified in Family Medicine and is a Fellow of the American Academy of Family Physicians. Over the past decade, he has served as the executive leader and champion for an array of clinical technology systems for both inpatient and ambulatory environments achieving high rates clinical system adoption through active physician engagement.

9:15am – 10:15am - Morning Event Keynote Presentation - Ohio Hospital/Health System/Medical Clinic CIO Panel Discussion

This session will discuss and focus on the following:

- What's next after core EMR – leveraging new technologies in health care?
- Leading through mergers, acquisitions and divestiture
- Outsourcing-its place in the current HIT environment

Moderator:

Mr. Jonathan Levoy
NOHIMSS Board of Directors member &
Executive Vice President
Alego Health
Westlake, OH

Jonathan Levoy began his employment with Alego Health in Nov. 2009 as the VP of Business Development & Technology. Mr. Levoy worked hand in hand with Alego Health's President, Jacqueline Forestall to develop and create the practices that transformed Alego Health into one of the nations' premier Healthcare IT Companies from the previous temporary staffing company as it was founded. Mr. Levoy previously worked as an executive level Marketing and Operations Manager in several service industries prior to his tenure at Alego Health; this experience has led to a greater understanding and implementation of the high level of customer service that Alego Health provides to all of its Clients. Jonathan has also pioneered several technological advancements for Alego that enhance Alego Health's performance and execution for Project Management and Client Interaction.

Discussion Panelists:

Mr. Dave Fiser
VP/Chief Information Officer
Information Systems
Cleveland Clinic Akron General
Akron, OH

Vice President and Chief Information Officer, Cleveland Clinic - Akron General. Dave has over 30 years experience in the Healthcare Information Technology field. Dave was appointed to Akron General Health System, Vice President and Chief Information Officer Position in December, 2009. Prior to that, he served as Interim Chief Information Officer and also held the positions of Director of Application Systems, Director of ERP/E-Business Applications, Manager of Applications, and Manager of Clinical Systems for Akron General Medical Center.

Ms. Terri Barber
Vice President /
Chief Information Officer (former)
Administration
Southwest General
Highland Heights, OH

Ms Barber is the former VP of Support Services and CIO at Southwest General Hospital. Prior to joining Southwest in 2008, she was the Regional Director of IT Operations for the Cleveland Clinic eastern community hospitals. Terri has been on the adjunct faculty at Ursuline College since 2010, and also taught in the healthcare MBA program at Baldwin Wallace College from 2003-2009. Ms Barber earned a BS degree from Bowling Green State University, and a M.Ed.degree from Cleveland State University. She is a certified project management professional (PMP) and a HIMSS fellow certified as a CPHIMS. She participates on the IT advisory board at Cuyahoga Community College, and at NOHIMSS (where she served as president in 2008-2009). Ms Barber was named "CIO of the Year" by Cleveland Crain's Business in 2013.

Ms. Sue Schade
Interim Chief Information Officer
Information Technology
University Hospitals Health System
Shaker Heights, OH

Sue Schade is a nationally recognized health IT leader and a founding advisor at Next Wave Health Advisors providing consulting, coaching and interim management services. Schade has nearly 30 years' experience in health care information technology management. Schade was named the CHIME-HIMSS John E. Gall, Jr. CIO of the Year in 2014. Schade is currently serving as the interim Chief Information Officer at University Hospitals Health System (UHHS) in Cleveland, Ohio. UHHS, with \$3.7B in revenue, includes the 1032-bed tertiary medical center University Hospitals, an affiliate of Case Western Reserve University. It also includes 11 wholly-owned community medical centers and over 30 major outpatient centers.

Ms. Robin Stursa
VP & Chief Information Officer
Information Services
Sisters of Charity Health System
Cleveland, OH

Robin Stursa has served for six years as the vice president and chief information officer for the Sisters of Charity Health System. Prior to joining SCHS, Stursa served in the same capacity at Saint Vincent Health System in Erie, Pennsylvania. Stursa started her HealthCare IT career in 1997 as the IT Director for Catholic HealthCare Partners-Community Health Partners, Lorain Ohio, now Mercy Health. Stursa serves on the Advisory Board for the State's HIE Clinisync and is a member of the College of Healthcare Information Management Executives and Healthcare Information and Management Systems Society.

Mr. Don Reichert
VP, Chief Information Officer
Information Services
MetroHealth
Cleveland, OH

Donald Reichert is the Vice President, Chief Information Officer at MetroHealth, Cleveland, Ohio. In this role, Reichert is responsible for overseeing MetroHealth's local, regional and national leadership in health information technology. Don has more than 30 years of experience in the health care industry, with an extensive background in and understanding of Information Technology operations and trends. Prior to joining MetroHealth, Reichert was the Vice President and Chief Systems Officer at NorthShore Health Systems in Chicago. He also has held management IT positions at Spartanburg Regional Medical Center in Spartanburg, S.C., and Group Health Associates in Cincinnati. Reichert earned both a bachelor's and master's degree from the University of Cincinnati, and a Master of Health Services Administration degree from Xavier University. He is a member of the American College of Healthcare Executives, the Healthcare Information Management Systems Society and the College of Healthcare Information Management Executives.

1:35pm to 1:40pm - Afternoon announcements & afternoon keynote session introduction

Giuseppe DiIulio
President-elect, NOHIMSS
Director, IT Consulting Services
Blue Chip Consulting
Independence, OH

Giuseppe DiIulio is the incoming President for Northern Ohio Healthcare Information and Management Systems Society (NOHIMSS). He has over 16 years' information technology experience with over 12 years of extensive background and experience within the Healthcare Information Technology arena in various capacities at the Director level. He is currently a Director at Blue Chip Consulting Group that provides Platform Optimization Consulting Services.

1:40pm to 2:30pm - Afternoon Event Keynote Presentation - Ohio Hospital/Health System/Medical Clinic CMIO Panel Discussion

Please join these physician experts for the afternoon keynote address in the main ballroom. The CMIO panel will address any of the following topics during this session.

- Efforts to engage or improve caregivers and patients around technology
- Successful implementation strategies
- Technology enablement of value based care
- The newest efforts on the health information exchange front
- Top technology challenges facing healthcare organizations

Moderator:

Robert S. White, MD, FAAFP
NOHIMSS Chapter President /
Chief Medical Information Officer
Allegheny Health Network
Pittsburgh, PA

See bio on previous page.

**Discussion Panelists:**

Dr. Louis Capponi
Chief Medical Information Officer
Information Technology Division
Cleveland Clinic
Cleveland, OH

Dr. Capponi is a General Internist focused on improving health through information technology. From 2004 to 2014 he held roles of Enterprise-wide CMIO and Assistant Vice President for Clinical Information Systems for New York City's municipal hospital system, the largest in the United States. There he implemented population-health programs including patient registries, designed clinical decision support applications, and created data warehouses for monitoring quality and outcomes. Today, as CMIO for the Cleveland Clinic Dr. Capponi is working to apply Health Information Technology as a value-driver for risk-based payment arrangements, and in support of innovative care models while and promoting increased usability and safety.

Dr. Capponi received his undergraduate and medical education at New York University. He is Board Certified in Internal Medicine and Clinical Informatics, a fellow in the American College of Physicians, and Clinical Assistant Professor at the Cleveland Clinic Lerner College of Medicine of Case Western Reserve University.

Dr. Milisa Rizer
Professor & Chief Medical
Information Officer
Family Medicine
The Ohio State University –
Wexner Medical Center
Columbus, OH

Dr. Milisa Rizer has been a Family Medicine Physician for the past 30 years and presently practices at The Ohio State University where she started 14 years ago as the vice chair of clinical services. She is the Chief Medical Information Officer at the Ohio State University Wexner Medical Center. She is a professor of Family Medicine, Nursing, and Biomedical Informatics. She actually started her career as a nurse and taught nursing in a 3 year diploma school of nursing in southeastern Ohio. She led the installation of the electronic medical record at Ohio State in both the ambulatory area and acute care setting. She has been involved in HIMSS EMRAM stage 7 visits in Ohio, West Virginia, Hawaii, Iowa, and China. She is a HIMSS Fellow, board certified in family medicine as well as clinical informatics, and is CPHIMS certified.

Dr. Brian Miller
Chief Medical Information Officer
Health Information Technology
ProMedica
Maumee, OH

Brian Miller MD has been the Chief Medical Information Officer of Promedica Health Systems in northwestern Ohio since November 2013, after serving as Director of Medical Operations there from 2010. A member of the American Academy of Family Physicians, he has been Board Certified through the American Board of Family Medicine since 1988. He joined Fallen Timbers Family Physicians, a founding practice of the AAFP, in 1992, and served as the lead clinician and managing business partner there for 20 years. An Ohio native, he graduated from The Ohio State University College of Medicine after receiving dual bachelor degrees in Biology and English Literature.

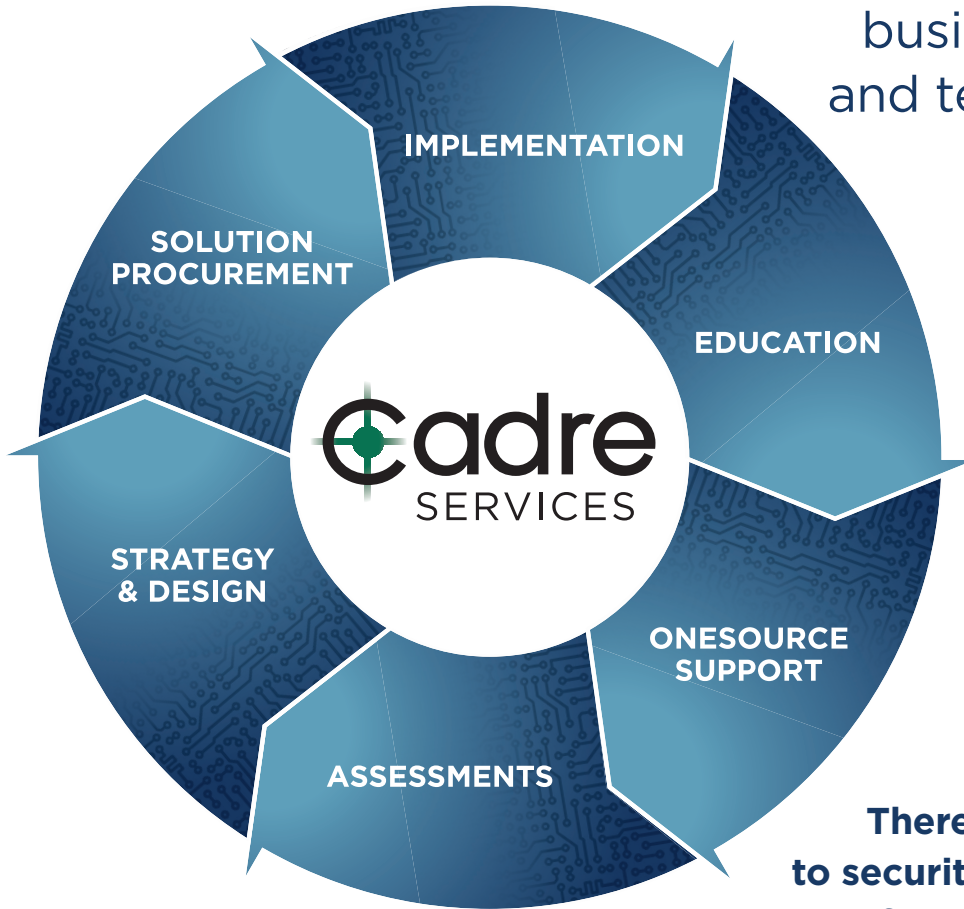

Dr. David Kaelber
Chief Medical Informatics Officer &
VP Health Informatics
Clinical Informatics, Internal
Medicine, and Pediatrics
The MetroHealth System
Cleveland, OH

Dr. David Kaelber is a practicing internist and pediatrician and the Chief Medical Informatics Officer and Vice-President of Health Informatics for the MetroHealth System. He is board certified in Clinical Informatics. Dr. Kaelber and his team have placed the MetroHealth System in the top 1% of all healthcare systems in the US in terms of clinical information system implementation, use, and effectiveness based on achieving HIMSS electronic medical record adoption model (EMRAM) Stage 7 in 2014 for both its hospital and ambulatory clinics and a HIMSS Enterprise Davies award in 2015. Dr. Kaelber received his MD and PhD in Biomedical Engineering from Case Western Reserve University. He completed a 2-year National Library of Medicine Clinical Informatics fellowship at Partners Healthcare in Boston while completing his MPH at the Harvard TH Chan School of Public Health.

YOUR NETWORK IS IMPORTANT TO YOU

and it's critically important to us.

Does alignment of business, organizational and technical goals seem impossible to you?

Not to us.

Our team of experienced strategists can help identify the security solutions that best suit your business needs. We take the complexity out of the network, giving you the confidence that comes from proven, measurable results.

There is no ONE single solution to security, but there is ONE source for ongoing security guidance.

Visit our booth at the Northern Ohio Healthcare Trade Faire & Regional Conference to learn more about Cadre and our fellow title sponsors:

Simplifying the business of security.

11:50am to 12:30pm - Room 26C

Are You Prepared?

Join us for this informative session where we will discuss how attackers have become more creative in how they reach corporate resources. Protecting the enterprise border with traditional threat prevention is no longer enough. Attendees to this session will learn how Check Point Sandblast and Mobile Threat Prevention (MTP) solutions deliver defense with greater catch rates and comprehensive intelligence securing enterprise devices both on and off "field". Sandblast and MTP proactively stops botnets, targeted attacks, advanced persistent threats (APTs) and zero-day attacks across traditional enterprise and mobile clients.

The Next Generation of Controlled Substance Prescription History Reports for the Health Care Professional

Even as prescription (drug) monitoring programs (PMP or PDMPs) are acknowledged as important tools in discovering potential abuse, misuse or diversion of controlled substances, analyzing the data provided can be time-consuming and challenging. This presentation provides an introduction to the next generation of these PMP request reports that can be generated from data contained in a prescription monitoring program. Through NARxCHECK, authorized prescribers and pharmacists are presented advanced analytics and graphical representations of PMP data. This allows for improved and more efficient comprehension of a person's complete controlled substance prescription history in order to both improve patient safety as well as identify potential controlled substance prescription misuse and/or abuse.

Notes: _____

Prescribe with Confidence.

Analytical insight into a patient's prescribing history *directly* in your EHR.

Helps Ensure Patient Safety

Identify potential abuse/misuse with at-a-glance scoring.

Saves Valuable Time

It takes an average of 3-5 minutes to open and analyze a standard PMP report. NARxCHECK delivers PMP analytics in seconds.

Assures Compliance

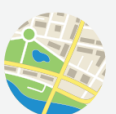

With applicable state laws.

For more information about NARxCHECK visit:
www.appriss.com/narxcheck

Keeping communities safe and informed.

Silver Sponsor/Exhibitor

Presenting Company: Imprivata

11:50am to 12:30pm - Room 25B

Securing Patient and Provider Identities in a Mobile World

Electronic patient data is flowing from care providers, medical devices, phones and wearables at hospitals, practices, clinics and homes. How can we ensure that authorized care providers and patients can access – and make critical decisions base on – the correct information, from wherever they may be, without the risk of a breach? This session will explore methods for securing patient and provider identities, including: Palm vein scanning for patient ID; Single sign-on for secure access to patient data; 2 factor authentication for secure remote access; and EPCS and clinical workflow productivity.

Moderator:

Barbara Dumery,
VP Product Management,
Imprivata

Panelists:

Carole Ettinger, PMP, CPHIMS,
Interim Program Director,
Application Solutions,
Akron Children's Hospital

Brian Keaton, MD, FACEP
Chief Medical Information Officer,
Cleveland Clinic/Akron General

Notes: _____

Imprivata solutions

- Positive patient identification
- Single sign-on and fast virtual desktop access
- Secure communications
- Identity and two-factor authentication for remote access, EPCS, and clinical workflows

Visit Imprivata at booth #26 for more information and for a chance to win a Bose speaker.

Ohio HIE focused executive panel discussion & presentation 10:45am – 11:30am Room 26C

Attendees at this session will hear panelists discuss and present timely HIE information on:

- Providing the business case for health information exchange.
- All of the new payment reform models are reliant on access to discrete clinical data from multiple sources which is one major service that the HIE can provide.
- How a health information exchange can support and augment internal data needs about patients as the delivery system progresses towards reform.
- (Time permitting) the expansion of interoperability into other sectors of healthcare could also be discussed. The recent IMPACT Act places interoperability requirements on the LTPAC sector (long term care, skilled nursing facilities, home health, rehab centers, etc.) starting in 2018.

Ohio Leaders of HIM executive panel discussion This session presented in partnership with OHIMA 2:50pm to 3:30pm Room 25B

This panel will discuss and share thoughts and perspectives on the following: Scanning is a hot topic in HIM departments today.

- What do you find to be the pros and cons of scanning in your facility?
- Does your facility scan everything they receive from external facilities? Or just a core set of documents?
- On the note of scanning external medical records, is your facility leveraging the Health Information Exchange to decrease the amount of paper, better continuity of care and help with disclosure management? Interfaces ... they seem to be exponentially increasing as facilities become more electronic. They are great when they work. A struggle when they don't. What difficulties have you encountered with interfaces in your department? Another hot topic is Mobile Technology.
- What types of security measures does your facility have in place?

Do you allow staff to access the EMR with a personal devices (cell phone, etc.)?

Has your staff experienced any phishing scams? Does Release of Information encrypt devices (USB, CDs) when releasing them with patient info on them?

What are your facilities doing to prepare for Ohio Medicaid EAPG Outpatient Prospective Payment System (Implementation Date: January 1, 2017)?

Additional topics to be discussed if there is time permitting.

**Make it personal A call to action for Healthcare**

Attendees will learn what Intel's Health and Life Sciences group is investing in to utilize technology to meet healthcare challenges

- Workplace Transformation and Trends affecting clinical workflows
- Current "one-size-fits-all" model is unsustainable
- Triple aim of creating a sustainable healthcare system must be focused on lowering cost while improving both quality and access - with life expectancies increasing, an aging and potentially sicker population with both acute and chronic conditions will further exacerbate these factors, placing additional strain on an already overloaded and outdated approach

SPONSORS AND EXHIBITORS

Gold Level Sponsors/Exhibitors

Cadre Information Security - Cadre is a WBE certified network and information security solutions provider. Recognized as a pioneer in the security industry, Cadre delivers value through superior customer service, advanced engineering and a resolute focus on design, assessment, installation, training and support of information security systems. We also have brought our partners Check Point and BitSight Technologies with us. Check Point is a leader in securing the Internet. It is a market leader in the worldwide enterprise firewall, personal firewall and VPN markets. BitSight Technologies is transforming how companies manage information security risk with objective, evidence-based security ratings. The company's Security Rating Platform continuously analyzes vast amounts of external data on security behaviors in order to help organizations manage third-party risk, benchmark performance, and assess and negotiate cyber insurance premiums. **Visit with us in booth 20b**

Silver Level Sponsors/Exhibitors

Appriss - As a leading technology provider in healthcare, Appriss Inc., is committed to improving patient safety and combatting drug diversion and abuse through enhanced integration. Our prescription monitoring program (PMP) solutions, PMP Gateway and NARxCHECK, allow healthcare providers to share prescription dispensing information to help identify controlled substance abuse/misuse. In 2015, the state of Ohio selected Appriss' PMP Gateway to enhance the Ohio Automated Rx Reporting System (OARRS) and integrate opioid prescription histories into electronic health records and pharmacy dispensing systems across the state. In addition to integrated access from within the clinical workflow, NARxCHECK provides risk scoring and analytics to help increase prescribing and dispensing confidence. **Visit with us in booth 25**

CareTech - CareTech Solutions is an information technology (IT) provider for U.S. hospitals and health systems. CareTech's more than 1,400 U.S.-based professionals create value for clients through customized IT solutions that contribute to improving the patient experience while lowering healthcare costs. www.caretech.com. **Visit with us in booth 1**

Imprivata - Imprivata, the healthcare IT security company, provides healthcare organizations globally with a security and identity platform that delivers authentication management, fast access to patient information, secure communications, and positive patient identification. Imprivata enables care providers to securely and efficiently access, communicate, and transact patient health information to address critical compliance and security challenges while improving productivity and the patient experience. Imprivata OneSign offers single sign-on, authentication management, biometric identification and virtual desktop roaming enabling fast, secure No Click Access to clinical applications and patient information, anytime, anywhere and from any device. Imprivata Cortex enables clinicians to securely collaborate across care teams and organizations. Imprivata Confirm ID is the comprehensive two-factor authentication platform for remote access and clinical authentication workflows across healthcare. Imprivata PatientSecure is a positive patient identification solution that uses palm vein recognition biometrics to accurately identify patients at any point of entry to care. **Visit with us in booth 26**

Surescripts - Visit Surescripts to learn how to take the frustration out of prior authorization. Surescripts CompletEPA® is a real-time, fully automated electronic prior authorization solution. It pre-populates questions, sends prior authorization requests, and then returns the response in minutes (not days) right within the EHR workflow you use every day. It's quick, easy and effective, relieving staff of manual prior authorization fatigue and ensuring that patients get their medications without delay. **Visit with us in booth 31**

Exhibitors

ACF Technologies - ACF offers Patient Xperience Management solutions for both the public and private healthcare sectors. Through the combination of our cutting edge software and non-proprietary hardware devices ACF has redefined the patient experience. Our offerings prioritize appointments vs. walk-in traffic, transfer patients throughout departments within the hospital, and integrate with medical records software. In addition to improving the patient's experience, our solutions improve organization effectiveness by decreasing time and costs associated with patient interactions and streamlining back office processes. From start to finish, KPI metric data (wait times, service times, etc.) combines with customer feedback to help define improvement opportunities. **Visit with us in booth 12**

Add On Data - Add On Data is your trusted partner for Healthcare IT - both bedside and beyond. We work with hospitals nationwide. Let us assist you in selecting/implementing the appropriate point-of-care technology.

- New/Used Sales & Factory-Certified Service
- Fixed Arm Installation & Integration Services
